JOB DESCRIPTION

Carbon Change Consultant

Location: Birmingham
 Salary: £27k-£32k
 Ref: LN/HQ00017330

Allen & York are actively recruiting for a **Carbon / Climate Change Consultant** to join a global multidisciplinary consultancy.

The successful candidate would be responsible for the delivery of carbon / climate change assessments for a wide range of projects including: environmental impact assessments (EIAs) and planning applications, carbon management services, due diligence work; assessing the performance of projects against national and international standards and to inform the development of project design.

The role involves mentoring of junior staff, contributing to winning new work and will often be client facing.

Essential Criteria:

- experience in carbon footprinting / carbon management across a range of project types
- knowledge of EU and UK legislation and policy influencing carbon and climate change
- knowledge of key methodologies and data sources associated with carbon footprinting
- well rounded knowledge on wider sustainability and climate change issues
- degree / post-graduate qualifications in a relevant discipline
- excellent communication skills

Desirable Criteria:

- experience in taking an active role in day-to-day running of long-term projects and delivering against scope, quality and budget
- power sector experience
- experience in environmental impact assessment, and working within EIA teams
- understanding of linked environmental topics such as air quality
- experience in renewable energy or financial aspects of carbon management
- experience of mentoring junior staff

My client is offering a competitive package + benefits and future career development and progression. If you would like further information on this role, please contact Lisa Newman on 01202 888 986 or email lnewman@allen-york.com.

To find out more about this position please contact our offices quoting for Ref. No. LN/HQ00017330
