# Vacancy: Data Analyst

**Start date** flexible

**Work place** Technopark, Zürich, Switzerland

**What you can expect from us**

A lot of interesting and varied work in an exciting environment. You will be given independent tasks related to the continued development of the ecoinvent database. The tasks will be varied; from improvements of existing datasets, collection of new data, literature reviews, technical support for the data providers and users of the database to work on cross-database projects. Due to the variability of the tasks you will get very well acquainted with the structure of the database and the challenges of life cycle inventory modelling in general.

### **What we expect from you**

### **Qualifications**

As an ideal candidate you have a Bachelor's or Master's Degree in Environmental Science, Environmental Engineering or related fields. You had classes and have done projects in Life Cycle Assessment. Ideally, you are already familiar with the methodology and the data structure of the ecoinvent database and have practical experience with it. Fluency in English (written and oral) is a must, knowledge of German is an advantage. Proven experience in working in a multicultural environment is beneficial as well.

### **Competences**

You are well organised, detail-oriented and have an efficient working approach. You can get oriented easily and quickly in a complex system of data. You have the ability to work on multiple tasks at the same time. Your work is systematic and thorough. You are a self-motivated team player with a strong focus on seeing projects through.

### **Interested?**

We offer you an attractive position within an international team. If you are interested, we look forward to receiving your online application. Please send your application to Tereza Léková at [levova@ecoinvent.org](mailto:levova@ecoinvent.org) (Subject: Application - Data Analyst) including a cover letter, your CV, references and possible starting date.

For further information related to the position please contact Tereza Léková at [levova@ecoinvent.org](mailto:levova@ecoinvent.org) or call at +41 44 633 35 72.
