HSE Advisor responsible for HSE management

DONG Energy A/S | Skærbæk/Gentofte

HSE Advisor responsible for HSE management of Wind Power construction projects

Join us and become HSE Advisor in our Project HSE Management department. The department supports all Wind Power projects from early development until end of construction. You will be part of a team of 8-10 HSE Advisors who give support in HSE Management within all project scopes.

Project HSE Management is part of Wind Power which has 1400 employees and is one of four business units in DONG Energy. Wind Power is the world's largest developer and operator of offshore wind power, and we use our unique knowledge in all phases of our wind turbine projects. During the last 20 years, we have developed and constructed the largest portfolio of offshore wind farms in Northern Europe.

You may choose freely to be based either at our office in Skærbæk near Fredericia or in Gentofte in the Greater Copenhagen area. However, you should expect some travel to other sites and contractor sites in Europe in relation to your work.

Areas of responsibility

As HSE Advisor, you are responsible for the HSE Management of one of our Wind Power construction projects. This entails ensuring safety in the working environment in relation to our projects during the design, tender and construction phases as well as managing project health, safety and environment documents and preparing tender documents and contracts.

Om DONG Energy A/S

DONG Energy er en af Nordeuropas

førende energikoncerner med hovedsæde i Danmark. Vores forretning er baseret på at fremskaffe, producere, distribuere, handle og sælge energi og tilknyttede produkter i Nordeuropa.

Furthermore, your key duties will be to:

- participate in negotiations with suppliers about compliance with HSE requirements
- review contractor performance and contribute to the continuous organisational development of the HSE function
- integrate and develop safety culture initiatives
- lead a project safety programme on your project (performance monitoring, safety campaigns etc.)
- participate in strengthening/improving our HSE project model across projects.

Your profile

You have a relevant educational background, for example a bachelor degree in engineering or equivalent, or you have the equivalent vocational qualifications and knowledge to fulfil the role. It is essential that you have a successful track record of work experience in an HSE role, preferably within development or construction projects. In addition, you have HSE experience from offshore and marine industry. Prior HSE experience with offshore wind farms and working with high voltage electrical equipment is an advantage.

Furthermore, it is essential that you have prior experience working with HSE management within the construction industry with responsibility for compliance with CDM Regulations.

You demonstrate good communication skills and a positive non-judgemental approach. Furthermore, you have a cooperative team-oriented attitude coupled with the ability to adapt and adjust to business requirements

We offer

A unique job and many challenges. Through your work, you will contribute to fighting climate changes as you participate actively in the development and implementation of modern energy solutions.

You have substantial freedom with responsibility, a competitive salary and an

informal and attractive working environment. We have an active employee policy which supports your career throughout the various phases of your working life.

In DONG Energy Wind Power, we have a high level of expertise and many complex and challenging work tasks. We work goal-oriented and efficiently with some of the world's largest offshore wind projects, and we are committed to reducing the cost of electricity.
